Cork is the "common" designation for the bark of the Cork Oak tree (Quercus Suber L). The bark is removed each 9 years, after the tree reaches its mature life stage (25 years). The extraction is made by trained personnel without cutting or arming the tree and the bark removal it's crucial for the growth process and life expectation of the Cork oak tree, which in some cases reach over 200 years.

The regular and sustainable extraction of Cork is an economic, social and environmental contribution for the development of rural areas in the Mediterranean basin, where you can find the main concentration of Cork Oak forests in the world.

CORTICEIRA AMORIM have always been recognized by the Sustainability practices implemented in the production processes, which take place from the raw material reception till the Cork "transformation" in daily life products taken into your Home or Production process.

CORK4U is one of Corticeira Amorim's brands, the world biggest producer of Cork products.

CORK4U has in its portfolio a wide range of products that will "solve your problem" with a sustainable solution. This range includes, for example, agglomerated Cork rolls & sheets that will allow you to improve the thermal comfort, noise insulation and energy savings.
